

**SMOKING
DOMES**

www.millenniumdomes.com

Have you tried our smoking domes?

Our domed structures provide a simple solution to a difficult problem. With the advent of the uk smoking ban, every food and drink establishment will be responsible for the provision of a dedicated shelter for outside smoking areas.

“Avoid losing your regulars”

Made of lightweight aluminium tubing and fire retardant opaque cotton canvas covers. The domes are aesthetically pleasing inside and out, providing light, bright and exciting interiors day or night. Every unit is simple to construct in any environment and can be open or closed on any or all sides.

“Creating opportunities for expanding your capacity, assuring customer satisfaction”

The domes are ideal in any environment. As a smoking dome they meet all the required standards within government guidelines, at the same time offering an additional outside space that can be used for any other activities such as weddings or for private hire.

“Unique branding opportunities”

“The Dome’s greatest asset is its modular design”

There are endless possibilities for plan and design layout. With this modular system there are no space limitations, additional sized units can be purchased or hired and placed together to create alternative areas within your designated plot. Larger domes can be used for dining rooms, dancefloors or meeting spaces which can be linked to a whole range of different areas, creating lounges, bars, walkways, receptions or showrooms. The rest is up to your imagination..

If you would like any further information on the domes, branding possibilities or a quotation, don't hesitate to contact us.
